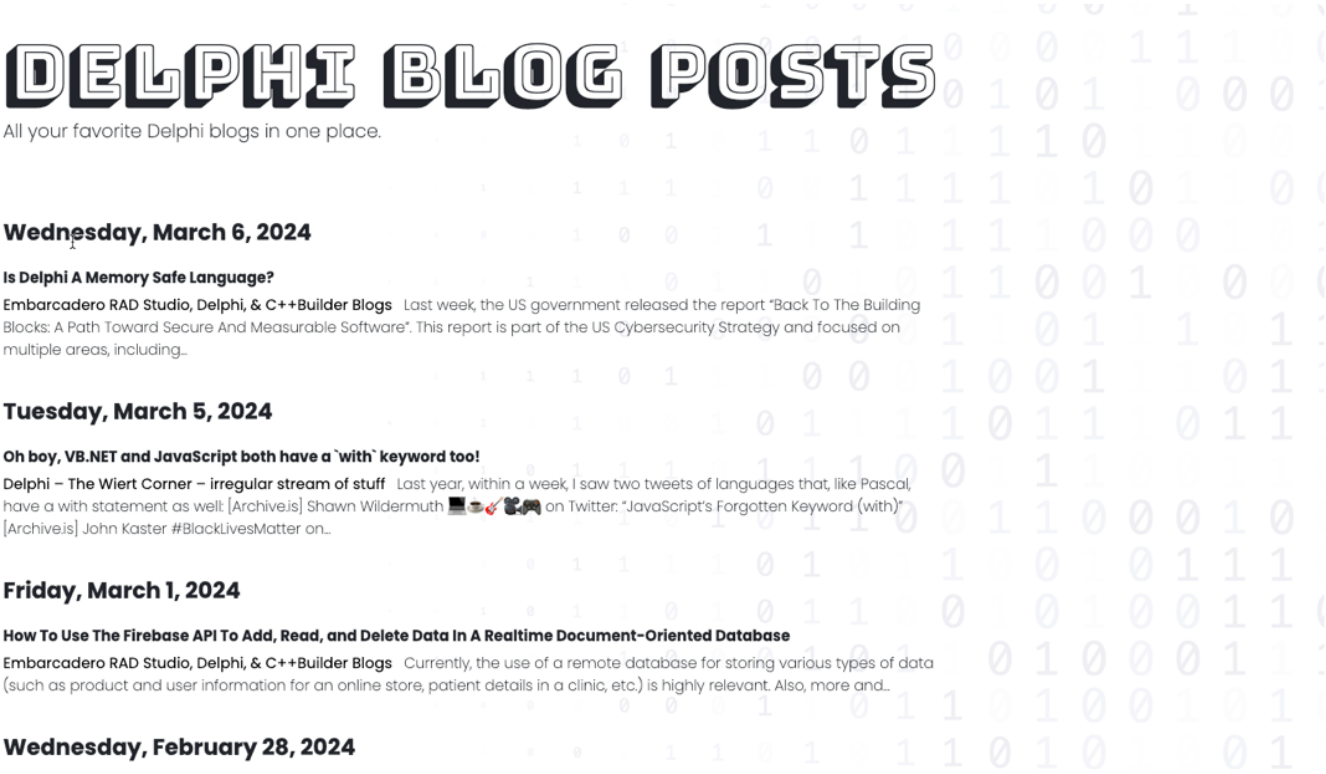
TUTORIAL · MARCH 20, 2024

Blog posts - Web design with TMS WEB Core

By Dr. Holger Flick

Enjoy this two part video series where I show you how to design a web site for blog posts with TMS WEB Core.

- In the first part, I show how to create a modern, responsive web design using Bootstrap. We will also create a header using a custom Web font from Google Fonts. *Visual Studio Code* will facilitate the development process for the design which will then be imported into the TMS WEB Core project in *Embarcadero RAD Studio*. Note that you can use *TMS WEB Core for Visual Studio Code* for the whole process if you like. The final result is shown in the next screenshot.
<iframe width="560" height="315" src="https://www.youtube.com/embed/zrKxxCpesnc?si=LHmtHJy_SUiInnfF" title="YouTube video player" frameborder="0" allow="accelerometer; autoplay; clipboard-write; encrypted-media; gyroscope; picture-in-picture; web-share" referrerpolicy="strict-origin-when-cross-origin" allowfullscreen></iframe>



Web design with TMS WEB Core

- The second part will load aggregated Delphi blog posts from several sources and display them in a list. The backend will not be focused on in this series. At this point we will make use of the web design and generate the content dynamically fetching the information from the backend. The content will be grouped by day and each post can be clicked to show the full content.
<iframe width="560" height="315" src="https://www.youtube.com/embed/hBc7Xjxx5tg?si=QDkzNZGhZOEy02r6" title="YouTube video player" frameborder="0" allow="accelerometer; autoplay; clipboard-write; encrypted-media; gyroscope; picture-in-picture; web-share" referrerpolicy="strict-origin-when-cross-origin" allowfullscreen></iframe>

Thank you to the sponsor!

This video series is sponsored by TMS Software. Their enthusiasm for Delphi made it possible for me to use all their products used in this tutorial and build real-world use cases for the community. They make it possible to offer this multi-part video series for free on YouTube.

INDEPENDENT · AD-FREE · READER-SUPPORTED

Free to read. Not free to make.

Every tutorial, article, and line of example code on Holger's Code is published without a paywall and without ads. This page is about what keeps it that way.

Professional work, published free

The content here is held to the same standard as professional client work: every tutorial is built as a real project, tested against current versions, documented step by step, and revisited when the frameworks move on. A single in-depth tutorial routinely takes days — and that's before the bills behind it: servers, storage, build infrastructure, licenses, and the hardware everything is verified on.

If an article or tutorial here has saved you an afternoon of debugging, taught you a technique, or helped you ship, it created real value for you. Supporting it isn't charity — it's paying for professional work you found useful, at whatever price you choose. And if you can't, keep reading anyway. That's what the free part means.

Ways to support

KO-FI

Buy me a coffee

A one-time tip — no account, no subscription, any amount.

BOOKS & COURSES

Buy the paid work

The paid tier of everything published free here — and you get something lasting in return.

SPREAD THE WORD

Share an article

Send a tutorial to a colleague, cite an article, subscribe to the RSS feed.

Nothing here goes behind a paywall, whether you chip in or not. But if something on this site earned its keep today, this is where to say so.
